

Integrated Teaching In Phase IV

All the departments of phase iv (Medicine & allied Topics, Surgery & Allied Topics and Gynecology & Obstetrics) must be present and take part in the integrated teaching while the faculty representatives from concerned clinical and other departments will also participate actively. Teachers will be the speakers in each session. Participation of the students of phase IV should be ensured. Students need to get some take home message from every session. To ensure presence of the students 10 (ten) marks will be allocated from practical part of the professional examination as a part of integrated teaching and submission of write up on what was learned by the student as summary. Schedule of integrated teaching session will be set at the phase IV committee meeting in collaboration with medical education unit (MEU).

Each session will be for at least 3 hours

Topics :

- | | |
|-------------------------------|---------------------------------------|
| 1. Hypertension | 22. Low Back Pain |
| 2. Tuberculosis | 23. Joint Pain |
| 3. Thyroid Disorder | 24. Osteoporosis |
| 4. Acute Kidney Injury(AKI) | 25. Acute abdomen |
| 5. Fever | 26. Thrombophlebitis/Phlebothrombosis |
| 6. Oedema | 27. Sepsis |
| 7. Chest pain | 28. Infection Prevention & Control |
| 8. Acute respiratory distress | 29. Shock |
| 9. DM | 30. Fluid and Electrolytes- |
| 10. Jaundice | 31. Burn |
| 11. Diarrhea and vomiting | 32. Per rectal bleeding- |
| 12. Nutrition | 33. Vertigo |
| 13. Pediatric Emergency | 34. Congenital anomalies |
| 14. Headache | 35. Wound infection |
| 15. Anxiety | 36. Urinary Tract Infection (UTI) |
| 16. Depression | 37. AUB |
| 17. Psychosis | 38. Convulsion |
| 18. Drug reaction | 39. Abdominal Lump |
| 19. Generalised pruritus | 40. Anaemia |
| 20. Purpura | 41. Unconsciousness |
| 21. STI | 42. Delirium & Dementia |

Topic	Learning Objective	Core Contents	Other Discipline Involved
Hypertension	At the end of the session students will be able to - • define hypertension • classify hypertension • mention causes of secondary hypertension • mention complications • mention accelerated and malignant hypertension • plan Investigations • manage hypertension as well as complications • evaluate and manage hypertension in pregnancy • manage of hypertension before, during and after surgery	• Definition • Classification • Etiology • Secondary hypertension • Approach to newly diagnosed hypertension • Measurement of blood pressure in different posture with importance • History and physical examination • Target organ damage • Investigation • Management • Anti-hypertensive drugs • Hypertension in pregnancy • Hypertension and surgery	• Internal Medicine/ Cardiology • General Surgery • Obstetrics and Gynaecology • Ophthalmology
Tuberculosis	At the end of the session students will be able to - • mention epidemiology • explain pathology and pathogenesis • enumerate organ involvement • describe the natural history of untreated primary TB • mention clinical features of pulmonary TB • mention clinical features of extra pulmonary TB • perform necessary investigations • manage a case of TB • manage TB in pregnancy • diagnose and manage drug reaction to Anti TB drugs • evaluate role of surgery in TB	• Epidemiology • Pathogenesis & Pathology • Clinical features – pulmonary, extra pulmonary • Investigations • Management • TB in pregnancy • Drug reaction to Anti TB drugs • TB and surgery	• Internal Medicine • General Surgery • Obstetrics and Gynaecology • Dermatology • Ophthalmology • Otolaryngology • Orthopedics • Pediatrics
Thyroid Disorders	At the end of the session students will be able to - • list common thyroid disorders • mention hypo function of thyroid with etiology • mention hyperfunction of thyroid with etiology • state the causes of thyroid enlargement • enumerate the clinical features of hypothyroidism and hyperthyroidism • perform necessary investigations for suspected case of thyroid dysfunction and their interpretation	• Thyrotoxicosis ○ Definition ○ Causes ○ Clinical features ○ Investigations ○ Management ○ Crisis • Hypothyroidism ○ Definition ○ Causes ○ Clinical features ○ Investigations ○ Management ○ Crisis • Thyroid lump/swelling ○ Causes	• Internal Medicine • General Surgery • Obstetrics and Gynaecology • Otolaryngology • Skin and VD

	• manage hypothyroidism and hyperthyroidism	○ Clinical assessment ○ Investigations • Transient thyroiditis • Autoimmune thyroiditis • Thyroid disorder in pregnancy • Surgery and thyroid dysfunction	
Acute Kidney Injury(AKI)	At the end of the session students will be able to - • define AKI • list causes of AKI • describe the pathophysiology of AKI • mention clinical features • plan Investigations • manage cases • mention complications of AKI • identify and manage AKI in paediatrics • evaluate and manage pregnancy with AKI • diagnose and manage AKI related with surgery	• Definition of AKI • Causes of AKI • Pathophysiology of AKI • Clinical features • Investigations • Management • Complications of AKI • AKI in paediatrics • AKI in Pregnancy • AKI related with surgery	• Internal Medicine/ Nephrology • General Surgery • Obstetrics and Gynaecology • Paediatrics
Fever	At the end of the session students will be able to - • list the etiology of fever • Investigate a case • mention management of cases & management of complications both in adults and in children. • evaluate and manage fever during pregnancy • mention the role of surgery in management of a case of fever • list the consequences of fever	• etiology of fever • Investigation of a case of fever • management of fever and management of complications both in adults and in children. • management of fever during pregnancy • the role of surgery in management of a case of fever • consequences of fever	• Internal Medicine/ Gastroenterology • General Surgery • Obstetrics and Gynaecology • Paediatrics
Oedema	At the end of the session students will be able to - • define oedema • explain the pathophysiology • list the causes • mention clinical assessment of a case of oedema • investigate a case • plan management both in adults and in children. • evaluate and manage oedema during pregnancy • mention the role of surgery in selective cases of oedema	• Definition of oedema • Pathophysiology • Causes of oedema • Clinical assessment of a case of oedema • Investigations • Management both in adults and in children. • Evaluation and management of oedema during pregnancy • Role of surgery in selective cases of oedema	• Internal Medicine • General Surgery • Obstetrics and Gynaecology • Paediatrics

Chest pain	At the end of the session students will be able to- • mention the causes of chest pain • outline the Systematic approach to most of the common causes chest pain (History and clinical exam) • interpret the findings in term of diseases, possible causes, and plan of investigations • make emergency decision regarding management • plan treatment	• Causes of chest pain • Systemetic approach to chest pain • Clinical features of chest pain • DDs of chest pain • Lab diagnosis of chest pain • Treatment of chest pain	• Internal Medicine/Respiratory Medicine • General Surgery • Obstetrics and Gynaecology • Cardiology
Acute respiratory distress	At the end of the session students will be able to- • mention the causes • outline the systematic approach to most of the common causes of respiratory distress(history and clinical exam) • outline the plan of investigations • interpret the findings to reach the cause and to exclude differential diagnosis • plan treatment approach	• Causes • Systemetic approach • Clinical features • Lab diagnosis • Treatment	• Internal Medicine • General Surgery • Obstetrics and Gynaecology • Cardiology • Respiratory Medicine
Diabetes Malaitus(DM)	At the end of the session students will be able to: • define DM • classify DM • describe brief pathophysiology • state presenting features • mention short term and long term complications. • outline laboratory diagnosis • mention WHO guideline • manage DM in different clinical settings (in pregnancy, children, in kidney disease)	• Definition of DM • Classification of DM • Pathophysiology of DM • C/F of DM • Complications of DM • Lab. diagnosis of DM • Management of DM (Including Special situation)	• Internal Medicine • General Surgery • Obstetrics and Gynaecology • Endocrinology • Skin and VD
Jaundice	At the end of the session students will be able to: • define jaundice • classify jaundice • explain the pathophysiology of different type of jaundice • outline systematic approach to differentiate different types of jaundice • plan relevant investigations • outline treatment approaches.	• Definition • Causes • Classification • Pathophysiology • C/F • Diffential diagnosis • Lab.investigations • Treatment	• Internal Medicine • General Surgery • Obstetrics and Gynaecology • Gastroenterology • Paediatrics

Diarrhea and vomiting	At the end of the session students will be able to: • define diarrhea • mention causes • describe pathogenesis • classify dehydration • assess dehydration • describe clinical presentation and consequences • plan investigations and interpretation • outline management • mention preventive measures	• Vomiting and causes • Diarrheal disease- a. Acute watery diarrhea b. Persistent diarrhea c. Dysentery • Assess dehydration and appropriate management • Composition of ORS , cholera saline • Complication • Prevention	• Paediatrics • Internal Medicine • General Surgery • Obstetrics and Gynaecology
Nutrition	At the end of the session students will be able to: • define IYCF • define nutrition • mention common nutritional problem • define malnutrition • classify malnutrition • explain growth chart • assess malnutrition • mention principals of management • describe vitamin deficiency • describe briefly the micronutrient deficiency • define obesity and malnutrition	• Nutrition • IYC • Definition • Common • nutritional • problems • Malnutrition • definition • classification • Growth chart • Assessment of malnutrition • Principals of • Management • Vitamin • Deficiency- common vit deficiency like A, D, K. • Micronutrient • Deficiency- Iron deficiency anemia • Obesity- definition, BMI, cause, clinical presentation, Investigations and interpretation • Complications	• Paediatrics • Internal Medicine • General Surgery • Obstetrics and Gynaecology
Pediatric Emergency	At the end of the session students will be able to: • mention the type of Poisoning • outline management of drowning, burn, dog bite, snake bite & status epilepticus • mention the preventive measures	• Poisoning- a) common house b) hold poisoning, c) kerosene poisoning, d) OPC poisoning, e) drug poisoning • Drowning • Burn • Dog bite • Snake bite • Status epilepticus	• Paediatrics • Internal Medicine • General Surgery • Obstetrics and Gynaecology
Headache	At the end of the session students will be able to:	• Definition of headache • Epidemiology of headache	• Psychiatry

	• define headache • mention the types of headache • perform the history taking of headache • state the clinical features of headache • mention the symptoms of headache related to intracranial causes • explain the symptoms of headache due to ophthalmic or ENT causes	• Common causes of headache • Types of headache • Tension headache • Migraine • Differential diagnosis of headache • Management of headache	• Internal Medicine • Neurology • Eye • ENT
Anxiety	At the end of the session students will be able to: • define anxiety • classify anxiety disorders • state the clinical features of anxiety disorder • diagnose GAD • mention the organic causes of anxiety • manage a case of anxiety disorder	• Definition of anxiety, anxiety disorder • Neurotransmitter involve in anxiety • Epidemiology of GAD • Signs and symptoms of anxiety disorders • Treatment of Anxiety disorder • Postpartum blue anxiety	• Psychiatry • Internal Medicine • Pediatrics • Obstetrics and Gynaecology
Depression	At the end of the session students will be able to: • define depression • classify depressive disorder • state the clinical features of depressive disorder • diagnose depressive disorder • mention the organic causes of depression • manage a case of depressive disorder	• Definition of depression & depressive disorder • Neurotransmitter involves in depression • Epidemiology of Depressive disorder • Sign symptoms of depressive disorder • Treatment of depressive disorder • Postpartum blue depression in children	• Psychiatry • Internal Medicine • Pediatrics • Obstetrics and Gynaecology
Psychosis	At the end of the session students will be able to: • define Psychosis • classify Psychotic disorder • state the clinical features of Psychotic disorder • diagnose Schizophrenia • diagnose Bipolar Disorder • manage a case of Schizophrenia • manage a case of Bipolar Disorder • state the prognosis of Psychotic disorder	• Definition of Psychosis, Hallucination, Delusion • Classification of Psychosis • Neurotransmitter involve in Psychosis • Epidemiology of Schizophrenia • Epidemiology of Bipolar disorder • Sign symptoms of Psychosis • ICU Psychosis • Postpartum Psychosis • Diagnostic criteria of schizophrenia	• Psychiatry • Internal Medicine • Obstetrics and Gynaecology

		• Diagnostic criteria of Bipolar Disorder • Treatment of Schizophrenia • Treatment of Bipolar disorder	
Delirium & Dementia	At the end of the session students will be able to: • define delirium & dementia • mention the causes of delirium & dementia • classify dementia • state the clinical features of delirium & dementia • diagnose a case of delirium & dementia • manage a case of delirium & dementia • state the prognosis of dementia	• Definition of delirium • Definition of dementia • Causes of delirium • Causes of dementia • Classification of dementia • Clinical feature of delirium • Clinical feature of dementia • Diagnosis of delirium • Diagnosis of dementia • Management of delirium • Management of dementia • Prognosis of dementia	• Psychiatry • Internal Medicine • Neurology
Drug reaction	At the end of the session students will be able to • define drug reaction • explain the pathogenesis of drug reaction • state the clinical features of drug reaction • differentiate drug reaction from other diseases • outline the investigations of drug reaction • outline the management of drug reactions	• Definition of drug reaction • Types of drug reaction • Pathogenesis of drug reaction • Clinical features of drug reaction • Differential diagnosis of drug reaction • Investigation of drug reaction • Management of drug reaction	• Department of Skin & VD, • Internal Medicine, • Paediatrics, • General Surgery, • Obstetrics and Gynaecology • Pharmacology, • Pathology
Generalised pruritus	At the end of the session students will be able to • define pruritus • mention the causes of generalized pruritus • mention the pathway of pruritus • explain pathophysiology of pruritus • outline the investigation of pruritus • outline the general and specific management of pruritus	• Definition of pruritus • Pathway of pruritus • Causes of pruritus • Pathophysiology of pruritus • Differential diagnosis • Investigation of pruritus • Management of pruritus	• Department of Skin & VD, • Internal Medicine, • Paediatrics, • General Surgery, • Obstetrics and Gynaecology
Purpura	At the end of the session students will be able to • define purpura and related terms • mention the causes of purpura • explain the pathogenesis of purpura • mention the types of purpura	• Definition of purpura • Types of purpura • Pathogenesis of purpura • Investigation of purpura • Management of purpura	• Department of Skin & VD, • Internal Medicine, • Haematology, • Paediatrics, • General Surgery, • Pathology

	• mention the investigation of purpura • describe the management of purpura		
--	--	--	--

STI	At the end of the session students will be able to • define STI and related terms • classify STI • clinical features of STI • mention the laboratory investigation of STI • differentiate STI from other diseases • describe the management of STI • outline prevention and control measures	• Definition of STI • Classification of STI • Clinical feature of STI • Laboratory investigations of STI • Differential diagnosis of STI • Management of STI • Prevention and control of STI	• Department of Skin & VD, • Internal Medicine, • General Surgery, • Microbiology • Community Medicine
Low Back Pain	At the end of session students will be able to: • define Low Back Pain • mention different types of Low Back Pain • describe the pathogenesis of Low Back Pain • enumerate the clinical features • list the required laboratory investigations • management with prevention.	• Definition of Low Back Pain • Types of Low Back Pain • Clinical stages of Low Back Pain • Pathophysiology • Clinical feature • Complication • Indication of operative and non-operative treatment.	• Pathology • Pharmacology • Physical Medicine • Radiology • Orthopedics
Joint Pain	At the end of session students will be able to: • explain the etiopathogenesis of the disease. • mention the causes of joint pain • list the types of arthritis • outline the management of the disease according to the causes	• Types of arthritis • Stages of all types of arthritis • Complications • Conservative vs surgical treatment	• Anatomy • Pathology • Pharmacology • Physical Medicine
Osteoporosis	At the end of session students will be able to: • mention basic physiology of the bone and pathology of osteoporosis • explain the consequences of osteoporosis • describe social and economic burden in the society • outline the management with a protocol of prevention	• Causes and types of Osteoporosis • Pathophysiology of osteoporosis • Complication • Drug used for Preventions	• Physiology • Pathology • Pharmacology • Endocrinology • Radiology • Obstetrics & Gynaecology
Acute abdomen	At the end of the session students will be able to: • define acute abdomen • list the common causes of acute abdomen	• Definition of acute abdomen • Causes and examples of acute abdomen • Surgical causes of acute abdomen • Medical causes of acute abdomen	• Internal Medicine • General Surgery • Obstetrics and Gynaecology

	• mention the surgical, medical & gynecological causes of acute abdomen • state the specific management protocol of acute abdomen	• Gynecological causes of acute abdomen • Specific management of acute abdomen	• Paediatrics,
Thrombophlebitis/Phlebothrombosis	At the end of the session students will be able to: • define thrombophlebitis • define phlebothrombosis • mention the etiology of thrombophlebitis & phlebothrombosis • explain the pathogenesis of thrombophlebitis & phlebothrombosis • state the clinical features of thrombophlebitis & phlebothrombosis • differentiate between thrombophlebitis & phlebothrombosis • state the name of procoagulant & anticoagulant • mention the complications of thrombophlebitis & phlebothrombosis • outline the management of thrombophlebitis & phlebothrombosis • state the measures of physiotherapy for prevention of thrombophlebitis & phlebothrombosis	• Definition of thrombophlebitis & phlebothrombosis • Etiology of thrombophlebitis & phlebothrombosis • Pathology of thrombophlebitis & phlebothrombosis • Clinical features of thrombophlebitis & phlebothrombosis • Names procoagulant & anticoagulant • Complications of thrombophlebitis & phlebothrombosis • Management of thrombophlebitis & phlebothrombosis • Preventive measures	• Internal Medicine • General Surgery • Obstetrics and Gynaecology • Pathology
Sepsis	At the end of the session students will be able to: • define sepsis, MODS, SIRS, bacteremia, pyemia, septic shock • mention the etiology of sepsis • explain the pathophysiology of sepsis • state the clinical features of sepsis • differentiate the stages of sepsis • state the investigations for sepsis • outline the general management of sepsis • assess the need of HDU and ICU support in sepsis • state the fate of sepsis	• Definition-MODS, SIRS, bacteremia, pyemia, septic shock • Etiology of sepsis • Pathophysiology of sepsis • Clinical features of sepsis • Investigations of sepsis • General management of sepsis • Fate of sepsis	• Internal Medicine, • General Surgery, • Obstetrics and Gynaecology • Pathology • Pharmacology

Infection Prevention & Control	At the end of the session students will be able to: • define sterilization • state the concept of disinfection • mention universal precaution of infection prevention & control • define hospital acquired infection • describe the cross infection • describe infection control in emerging diseases • mention prevention of hospital infections	• Concept of sterilization • Concept of disinfection • Universal precaution • Hospital acquired infection • Cross infection • Infection control in emerging diseases • Prevention of hospital infection	• Internal Medicine, • General Surgery • Obstetrics and Gynaecology • Pathology • Anaesthesiology • Critical care Medicine
Shock	At the end of the session students will be able to: • define shock • state the types of shock • explain the pathogenesis of shock • list the clinical features of shock • state the complications of shock • outline the general management of shock • state the indications of HDU and ICU	• Definition of shock • Types of shock • Pathogenesis of shock • Clinical features of shock • Complications of shock • General management of shock	• Internal Medicine, • General Surgery • Obstetrics and Gynaecology • Pathology • Anaesthesiology • Critical care Medicine
Fluid and Electrolytes	At the end of the session students will be able to: • state the daily input/output of fluids and electrolytes • mention the normal level of common electrolytes • define hypo and hyper natraemia • list the causes of hypo and hyper natraemia • mention the clinical feature of hypo and hyper natraemia • outline the treatment of hypo and hyper natraemia • define hypo and hyper kalaemia • state the causes of hypo and hyper kalaemia • mention the clinical feature of hypo and hyper kalaemia • outline the treatment of hypo and hyper kalaemia • define hypo and hyper calcimea • state the causes of hypo and hyper calcimea • mention the clinical feature of hypo and hyper calcimea • state the treatment of hypo and hyper calcimea	• Daily input/output • Normal level of common electrolytes • Definition of hypo and hyper natraemia, • Causes of hypo and hyper natraemia • Clinical features of hypo and hyper natraemia • Treatment of hypo and hyper natraemia • Definition of hypo and hyper kalaemia, • Causes of hypo and hyper kalaemia • Clinical features of hypo and hyper kalaemia • Treatment of hypo and hyper kalaemia • Definition of hypo and hyper calcimea , • Cuses of hypo and hyper calcimea • Clinical features of hypo and hyper calcimea • Treatment of hypo and hyper calcimea	• Internal Medicine, • General Surgery • Obstetrics and Gynaecology • Pathology • Anaesthesiology • Critical care Medicine • Biochemistry • Physiology

Burn	At the end of the session students will be able to: • define burn • state clinical feature of burn according to depth • explain the pathogenesis of burn • state the complications of burn • mention the assessment criteria of surface area of burn • state the assessment criteria of fluid requirement of burn • outline the general management of burn • state the compartmental syndrome and fasciotomy • define contracture • state the prevention of contracture • mention the reconstructive measures of contracture	• Definition of burn • Clinical features of burn according to depth • Pathogenesis of burn • Complications of burn • Surface area assessment of burn • Fluid requirement assessment of burn • General management of burn • Compartmental syndrome and fasciotomy • Contracture, prevention and reconstructive measures	• General Surgery • Plastic Surgery, • Paediatrics, • Anaesthesiology • Critical care Medicine
Per rectal bleeding	At the end of the session students will be able to: • define per rectal bleeding • state the types of per rectal bleeding • list the causes of per rectal bleeding • mention the clinical features of per rectal bleeding • state the investigation protocol of per rectal bleeding • outline the management of per rectal bleeding	• Definition of per rectal bleeding • Types of per rectal bleeding • Causes of per rectal bleeding • Clinical features of per rectal bleeding • Investigation protocol of per rectal bleeding • Management of per rectal bleeding	• Internal Medicine, • General Surgery • Obstetrics and Gynaecology • Pediatric surgery
Vertigo	At the end of session students will be able to: • define vertigo • classify vertigo • explain anatomy & physiology of balance • describe pathophysiology of vertigo • explain causes of vertigo • state sign & symptoms of vertigo • mention the investigations of vertigo • describe the management of vertigo • state rehabilitation procedure of patient with chronic vertigo	• Definition of vertigo • Classification of vertigo • Anatomy & physiology of balance • Pathophysiology of vertigo • Causes of vertigo • Symptoms & signs of vertigo • Investigation of vertigo • Management of vertigo • Rehabilitation of chronic vertigo	• Otolaryngology • Medicine • Ophthalmology • Orthopedics • Anatomy • Physiology
	At the end of session students will be able to: • define congenital anomalies / birth defects	• Definition of congenital anomalies / birth defects • Classification of congenital anomalies	• Pediatrics • Orthopedics • Cardiology

Congenital Anomalies	• classify congenital anomalies • mention the causes and risk factors of congenital anomalies • state the screening of congenital anomalies • list the common congenital anomalies • state epidemiology of common congenital anomalies • outline manage congenital anomalies • explain prevention of congenital anomalies • describe rehabilitation of a patients with congenital anomalies	• Causes & risk factors of congenital anomalies • Screening of congenital anomalies • Epidemiology of congenital anomalies • Common congenital anomalies • Management of congenital anomalies • Prevention of congenital anomalies • Rehabilitation of patients with congenital anomalies	• Plastic surgery • Otolaryngology • Anatomy
Wound Infection	At the end of session students will be able to: • define wound infection, surgical site infection & nosocomial infection • mention the causes and risk factors of wound infection and nosocomial infection • describe the pathophysiology of wound infection • list the clinical features of wound infection • describe the management of wound infection • explain prevention of wound infection and nosocomial infection • state the consequences of untreated wound infection	• Definition of wound infection, surgical site infection & nosocomial infection • Causes and risk factors of wound infection and nosocomial infection • Pathophysiology of wound infection • Clinical features of wound infection • Management of wound infection • Prevention of wound infection and nosocomial infection • Consequences of untreated wound infection	• Surgery • Obstetrics & Gynecology • Otolaryngology • Pathology • Microbiology
Urinary Tract Infection (UTI)	At the end of the session students will be able to: • define UTI • enumerate the micro-organisms responsible for UTI • explain the signs and symptoms of UTI • enumerate different investigations for UTI • explain the effects of pregnancy (hormonal) on UTI • explain the complications of UTI especially on pregnancy and fetus • list the drugs used for treatment of UTI • mention appropriate referral criteria for UTI	• Definition of UTI • Micro-organisms responsible for UTI • Signs and symptoms of UTI • Investigations for UTI • Effects of pregnancy (hormonal) on UTI • Complications of UTI on pregnancy and fetus • Drugs used for treatment of UTI • Criteria of referral for UTI	• Medicine / Nephrology • Obstetrics & Gynecology • Microbiology • Pharmacology

Abnormal uterine bleeding (AUB)	At the end of the session students will be able to : • define different types abnormal uterine bleeding (AUB) • explain the causes and pathophysiology of AUB • state the clinical features of AUB • mention the investigations for AUB • name the differential diagnosis of different causes AUB • outline the management approach of the cases of AUB	• Definition of different types AUB (like-menorrhagia, polymenorrhoea, oligomenorrhoea, amenorrhoea etc.) • Causes & Pathophysiology of AUB • Clinical features of AUB • Investigations for AUB • Differential diagnosis of different causes AUB (like- hypothalamic pituitary dysfunction, ovarian dysfunction, thyroid dysfunction, diabetes mellitus, haemoglobinopathies, thrombocytopenia & dengue) • Management approach of the cases of AUB	• Obstetrics & Gynecology • Medicine • Endocrinology • Haematology
Convulsion	At the end of the session students will be able to: • define convulsion • state the magnitude & patient profiles of convulsion • mention the causes of convulsion • list the clinical features convulsion • mention D/Ds of different types of convulsion • list the investigations for convulsion • outline the treatment of convulsion • state the prevention of convulsion • state complications of convulsion	• Definition of convulsion • Magnitude & patient profiles of convulsion • Causes of convulsion • Clinical features convulsion • D/Ds of different causes of convulsion (like- Head Injury, Brain Abscess, Brain Tumour, Tuberculosis, Epilepsy, Sepsis, Poisoning, Eclampsia) • Investigations for convulsion • Treatment of convulsion • Prevention of convulsion • Complications of convulsion	• Paediatrics • Obstetrics & Gynecology • Medicine / Neuro-medicine • Surgery /Neuro-surgery
Abdominal Lump	At the end of the session students will be able to- • define abdominal lump • mention the causes of different forms of abdominal lump • state the magnitude & patient profiles of abdominal lump • mention the clinical presentation abdominal lump • mention the investigations for abdominal lump • explain differential diagnosis of different form of abdominal lump • outline treatment of abdominal lump	• Definition of abdominal lump • Causes of abdominal lump (Different forms of abdominal lump like - GIT lumps, Lymphoma, Mesenteric Cyst, Enlarged liver, Enlarged Spleen, Fibroid Uterus, Benign Ovarian Tumor, Malignant Ovarian. Tumor & TO mass) • Magnitude & patient profiles of abdominal lump • Clinical presentation abdominal lump • Investigations for abdominal lump • Differential diagnosis of different form of abdominal lump • Treatment of abdominal lump	• Obstetrics & Gynecology • Surgery • Medicine • Oncologist

	• explain follow up of abdominal lump	• Follow up of abdominal lump	
Anaemia	At the end of session students will be able to: • define anaemia • classify anaemia • list common causes of anaemia in Bangladesh • explain clinical approaches (history taking, physical examination & investigations)) a patient with anaemia • describe treatment of anaemia • state management of anaemia before surgery • outline management of anaemia during pregnancy • mention prevention of anaemia	• Definition of anaemia • Classification of anaemia • Common causes of anaemia in Bangladesh • Approach (history taking, clinical examination and lab investigation) towards an anaemic patient • Treatment of anaemia • Management of anaemia before surgery • Management of anaemia during pregnancy • Prevention of anaemia	• Medicine/ Hematology • Obstetrics & Gynecology • Surgery
Unconsciousness	At the end of session students will be able to: • define unconsciousness • mention the level of unconsciousness. • list the causes of unconsciousness. • explain clinical approaches (history taking, physical examination & investigations)) towards an unconsciousness patient • outline emergency management of an unconscious patient. • describe general management of unconscious patient • mention indications emergency surgery for unconscious patient • mention emergency obstetrics care for unconscious patient.	• Definition of unconsciousness • Level of unconsciousness(including Glasgow Coma Scale) • Approach to an unconscious patient (history taking ,clinical examination, lab investigation and bedside investigation) • Responsibility of an emergency medical officer(ABC) • General management of unconscious patient • Indications emergency surgery for unconscious patient • Emergency obstetric care for unconscious patient.	• Medicine- Neuro-medicine • Surgery • Obstetrics & Gynecology
