

Medicine & Allied Subjects Departmental Integrated Teaching- Phase-IV

Medicine and Allied subjects of phase IV will organized the departmental integrated teaching on the following topics where faculty members of internal medicine and concerned allied subjects must be present and take part in the integrated teaching. While the faculty representatives from concerned clinical and other departments will also participate actively. Teachers will be the speakers in each session. Participation of the students of phase IV should be ensured. Students need to get some take home message from every session. To ensure presence of the students few marks will be allocated from practical part of the professional examination as a part of integrated teaching and submission of write up on what was learned by the student as summary. Schedule of the departmental integrated teaching session will be set by the department in coordination with the phase IV committee.

Each session will be for at least 2 hours

Topics :

1. Heart Failure
2. Congenital Heart Disease
3. Bronchial Asthma
4. Liver Abscess
5. Malabsorption syndrome
6. Irritable bowel syndrome(IBS)
7. Psoriasis
8. Leprosy
9. Autism spectrum disorder (ASD)
10. Somatoform disorder

Topic	Learning Objective	Core Contents	Other Discipline Involved
Heart Failure	At the end of the session students will be able to - define heart failure - classify heart failure - mention causes of heart failure - explain the pathophysiology of heart failure - state the clinical features - plan Investigations - outline management - mention complications	- Definition - Classification - Etiology - Pathophysiology - History and physical examination (clinical feature) - Investigation - Management - Complications	- Medicine - Cardiology - Pediatrics - Pharmacology - Pathology
Congenital Heart Disease	At the end of the session students will be able to - classify congenital heart diseases - mention the causes, pathogenesis and pathology of congenital heart diseases - state the clinical features - plan necessary investigations - outline management plan - evaluate role of surgery	- Classification - Aetiology - Pathogenesis & Pathology - Clinical features - Investigations - Management	- Medicine - Cardiology - Pediatrics
Bronchial Asthma	At the end of the session students will be able to - define Asthma - mention pathophysiology	- Definition - Pathophysiology - Clinical features - Diagnosis	- Medicine - Respiratory Medicine - Pediatrics

	- state clinical features - outline diagnosis measures of Bronchial asthma - outline management plan - outline diagnosis & management of acute severe asthma.	- Management - Acute severe asthma	- Cardiology - Dermatology - Psychiatry
Liver Abscess	At the end of the session students will be able to - define Liver Abscess - mention causes - describe pathophysiology of Liver Abscess - mention clinical features - plan Investigations - outline management of a case - outline plan to manage complications	- Definition - Causes - Pathophysiology - Clinical features - Investigations - Management - Complications	- Medicine - Gastroenterology/Hepatology - Paediatrics - Microbiology
Malabsorption syndrome	At the end of the session students will be able to - define malabsorption - explain pathophysiology - mention etiology - state clinical features - outline investigation of a case - plan management of malabsorption syndrome	- Definition - Pathophysiology - Clinical features in adults & in children - Investigations - Management of malabsorption both in adults and in children.	- Medicine - Gastroenterology - Paediatrics
Irritable bowel syndrome (IBS)	At the end of the session students will be able to - define IBS - describe pathophysiology - mention clinical features - outline investigation of a case - plan management	- Definition of IBS - Pathophysiology - Clinical features - Investigations - Management of IBS	- Medicine - Gastroenterology - Psychiatry
Psoriasis	At the end of the session students will be able to - define psoriasis - classify psoriasis - mention the causes and aggravating factors of psoriasis - explain the pathogenesis of psoriasis - mention the pathology of psoriasis - describe the clinical features of psoriasis - differentiate psoriasis from other mimicking diseases - mention the laboratory investigations of psoriasis - describe the management of psoriasis including special situations (pregnancy, children, kidney and liver diseases) - mention the complications and their managements	- Definition of psoriasis - Classification of psoriasis - Aetio-pathogenesis of psoriasis - Pathology of psoriasis - Clinical features of psoriasis - Differential diagnosis of psoriasis - Laboratory investigations of psoriasis - Management of psoriasis - Complications of psoriasis	- Department of Skin & VD - Immunology & Microbiology - Pathology - Rheumatology - Medicine - Psychiatry

Leprosy	At the end of the session students will be able to • define leprosy • mention the epidemiology of leprosy • classify leprosy • mention the clinical features of leprosy • mention the laboratory investigations of leprosy • differentiate leprosy from other mimicking diseases • describe the management of leprosy • mention the management of complications of leprosy • mention the prevention and control measures of leprosy	• Definition of leprosy • Epidemiology of leprosy • Classification of leprosy • Pathology of leprosy • Clinical features of leprosy • Differential diagnosis of leprosy • Laboratory investigation of leprosy • Management of leprosy • Complications of leprosy • Prevention and control of leprosy • Patient Education	• Department of Skin & VD • Medicine • Neuromedicine, • Community Medicine, • Microbiology, • Orthopedics
Autism spectrum disorder (ASD)	At the end of the session students will be able to • define ASD • classify ASD • explain pathophysiology • mention the epidemiology of ASD • state the aetiology of ASD • mention the presentation of ASD • list the clinical features of somatoform disorder • mention the differential diagnosis of ASD • differentiate the DDs of ASD • outline the management of a case of ASD • plan counseling • state the prognosis of ASD	• Definition of ASD • Classification of ASD • Pathophysiology • History and physical examination • Epidemiology of ASD • Aetiology of ASD • Clinical feature of ASD • Differential diagnosis of ASD • Difference between DDs • Management of ASD • Prognosis of ASD • Counselling	• Department of Psychiatry • Pediatrics • Neuromedicine • Medicine
Somatoform disorder	At the end of the session students will be able to • define somatoform disorder • mention the epidemiology of somatoform disorder • classify somatoform disorder • enumerate the aetiology of somatoform disorder • state the clinical features of somatoform disorder • mention the differential diagnosis • differentiate the different somatoform disorders • diagnose somatoform disorder • mention the management of a case of somatoform disorder	• Definition of somatoform disorder • Epidemiology of somatoform disorder • Classification of somatoform disorder • Aetiology of somatoform disorder • Clinical feature of somatoform disorder • Differential diagnosis of somatoform disorder • Different type of somatoform disorder • Management of somatoform disorders • Counseling	• Department of Psychiatry, • Medicine, • Neuromedicine • Physical medicine
