Personality & Personality disorder	Students will be able to: - Understand personality pattern of the patient - Understand different type of personality disorder - Diagnose and manage common personality disorder	- Origin of personality - Classification of abnormal personality - Different personality disorder - Diagnosis and management of personality disorder	2 hrs 2 hrs
4. Reaction to stressful experience	Students will be able to: - Understand the response to stressful events - Identify sign symptom of ASD, PTSD, Adjustment disorder - Diagnose and manage cases of ASD, PTSD, Adjustment disorder - identify special kinds of adjustment	- Response to stressful event - Defense mechanism - ASD- sign symptom, etiology, diagnosis and management - PTSD- sign symptom, etiology, diagnosis and management - Adjustment disorder- sign symptom, etiology, diagnosis and management - Adjustment to physical illness and handicap - Grief - Bereavement - Adjustment to sexual abuse	2hr - 1 hr - 1 hr - 1 hr 2 hr
5. Generalized anxiety disorder (GAD)	Students will be able to: - Identify clinical features and etiology of GAD - Take appropriate history from patient - Perform mental status examination of GAD patient - Diagnose and manage case of GAD	GAD- sign symptom, etiology, diagnosis and management	- 4 hrs
6. Phobic anxiety disorder	Students will be able to: - Identify clinical features and etiology of Phobic disorder - Diagnose and manage case of Phobic disorder	- Specific phobia - Social phobia - Agoraphobia	2 hrs

Subject	Learning Objectives	Contents	Teaching Hours
7. Panic disorder	Students will be able to: • Identify clinical features and etiology of Panic disorder • Take appropriate history from patient • Perform mental status examination of Panic disorder patient • Diagnose and manage case of Panic disorder	• Panic disorder - sign symptom, etiology, diagnosis and management	2 hrs
8. Obsessive compulsive disorder (OCD)	Students will be able to: • Identify clinical features and etiology of OCD • Take appropriate history from patient • Perform mental status examination of OCD patient • Diagnose and manage case of OCD	• OCD - sign symptom, etiology, diagnosis and management	2 hrs
9. Major depressive disorder (MDD)	Students will be able to: • Identify clinical features and etiology of MDD • Take appropriate history from patient • Perform mental status examination of MDD patient • Diagnose and manage case of MDD	• MDD - sign symptom, etiology, types diagnosis and management	2 hrs 3 hrs
10. Bipolar disorder	Students will be able to: • Identify clinical features and etiology of Bipolar disorder • Take appropriate history from patient • Perform mental status examination of Bipolar disorder patient • Diagnose and manage case of Bipolar disorder	• Bipolar disorder - sign symptom, etiology, types, diagnosis and management	2 hrs 3 hrs

Subject	Learning Objectives	Contents	Teaching Hours
11. Schizophrenia	Students will be able to: - Identify clinical features and etiology of Schizophrenia - Take appropriate history from patient - Perform mental status examination of Schizophrenia patient - Diagnose and manage case of Schizophrenia	- Schizophrenia - sign symptom, etiology, types - Diagnosis and management	- 2 hrs - 4 hrs
12. Dementia	Students will be able to: - Identify clinical features and etiology of Dementia - Take appropriate history from patient - Perform mental status examination of Dementia patient - Diagnose and manage case of Dementia	Dementia - sign symptom, MMSE, etiology, types, diagnosis and management	4 hrs
13. Movement disorder	Students will be able to: - Identify common movement disorder prevalent in psychiatric patient - Diagnose & manage movement disorder in psychiatric patient	- EPSE - Parkinson's disease - Tics	} 2 hrs
14. Seizure disorder	Students will be able to: - Understand seizure and pseudo seizure - Differentiate different types of seizures - Identify clinical features and etiology of Seizure disorder - Take appropriate history from patient - Perform mental status examination of Seizure disorder patient - Diagnose and manage case of Seizure disorder - Understand psychiatric aspect of epilepsy	- Seizure disorder- sign symptom, etiology, types, diagnosis and management - Pseudo seizure - Different types of seizure - Preictal, ictal, postictal, interictal disturbance and social aspect of epilepsy	4 hrs

Subject	Learning Objectives	Contents	Teaching Hours
15. Eating disorder	Students will be able to: • Identify clinical features of Eating disorder • Diagnose and manage case of Eating disorder	Sign symptom, etiology, types, diagnosis and management of – • Anorexia • Bulimia nervosa • Eating disorder (NOS)	2 hrs
16. Sleep disorder	Students will be able to: • Identify clinical features and etiology of Sleep disorder • Take appropriate history from patient • Diagnose and manage case of Sleep disorder	Sign symptom, etiology, types, diagnosis and management of – • Insomnia • Narcolepsy • Breathing related sleep disorder • Parasomnias	4 hrs
17. Sexual disorder	Students will be able to: • Identify clinical features and etiology of Sexual disorder • No classification of sexual disorder • Take appropriate history from patient • Diagnose and manage case of Sexual disorder	Sign symptom, etiology, types, diagnosis and management of – • Sexual dysfunction- in case of male and female • Paraphilia • Gender dysphoria	4 hrs
18. Somatoform disorder	Students will be able to: • Identify clinical features and etiology of Somatoform disorder • Take appropriate history from patient • Perform mental status examination of Somatoform disorder patient • Diagnose and manage case of Somatoform disorder	• Somatoform disorder- sign symptom, etiology, types, diagnosis and management	2 hrs
19. Conversion disorder	Students will be able to: • Identify clinical features and etiology of Conversion disorder • Take appropriate history from patient • Perform mental status examination of Conversion disorder patient • Diagnose and manage case of Conversion disorder	• Conversion disorder- sign symptom, etiology, types, diagnosis and management	4 hrs

Subject	Learning Objectives	Contents	Teaching Hours
20. Psychiatric aspect of obstetrics and gynaecology	Students will be able to: - Identify clinical features and etiology of Psychiatric diseases in obstetrics and gynecological cases - Take appropriate history from patient - Perform mental status examination of patients - Diagnose and manage the case	Sign symptom, etiology, types, diagnosis and management of – - Pseudocyesis - Postpartum mental disorders- maternity blue, Postpartum psychosis - Premenstrual syndrome	2 hrs
21. Suicide and deliberate self-harm	Students will be able to: - Identify clinical features and etiology of Suicide / deliberate self-harm - Take appropriate history from patient - Perform mental status examination of Suicide / deliberate self-harm patient - Diagnose and manage case of Suicide/ deliberate self-harm	- Suicide /deliberate self-harm - sign symptom, etiology, types, diagnosis and management - Assessment of suicidal risk - Care of suicidal patient - Motive for deliberate self-harm - Suicide prevention	4 hrs
22. Substance related disorder	Students will be able to: - Identify clinical features and etiology of Substance related disorder - Take appropriate history from patient - Perform mental status examination of Substance related disorder patient Diagnose and manage case of Substance related disorder	- Terminology- intoxication, Abuse, Dependence, Tolerance, Withdrawal state - Sign symptom, etiology, types, diagnosis and management of- - Alcohol related disorder - Opioid related disorder - Benzodiazepine related disorder - Cannabis related disorder - Amphetamine related disorder - Social media related disorder	1 hr 1 hr 1 hr 1 hr 1 hr 1 hr
23. Psychopharmacology	Students will be able to: Understand classification, mechanism of action indication, contra indication, adverse effects, dosages, and advises regarding use of psychotropic medicines.	- Class of drugs- - Antipsychotic - Antidepressant - Mood Stabilizer - Anxiolytic - Hypnotic - Psychostimulant	4 hrs

Subject	Learning Objectives	Contents	Teaching Hours
24. Psychological treatment	Students will be able to: • Understand different types of psychological treatment applicable on psychiatric patients	• Types of psychological treatment-counselling Cognitive behavior therapy Supportive psychotherapy Insight oriented psychotherapy Dialectic behavior therapy Family therapy Couple therapy	4 hrs
25. Child psychiatric disorder	Students will be able to: • Identify clinical features and etiology of Child psychiatric disorder • Take appropriate history from patient • Perform mental status examination of patients • Diagnose and manage case of Child psychiatric disorder	• Sign symptom, etiology, types, diagnosis and management of – ASD ADHD Conduct disorder Intellectual disability disorder	4 hrs
