

Surgery & Allied Subjects: Departmental Integrated Teaching- Phase-IV

Surgery and Allied subjects of phase IV will organized the departmental integrated teaching on the following topics where faculty members of General Surgery and concerned allied subjects must be present and take part in the integrated teaching. While the faculty representatives from concerned clinical and other departments will also participate actively. Teachers will be the speakers in each session. Participation of the students of phase IV should be ensured. Students need to get some take home message from every session. To ensure presence of the students few marks will be allocated from practical part of the professional examination as a part of integrated teaching and submission of write up on what was learned by the student as summary. Schedule of the departmental integrated teaching session will be set by the department in coordination with the phase IV committee.

Each session will be for at least 2 hours

Topics :

- | | |
|---|--|
| <ol style="list-style-type: none"> 1. Malignant Bone Tumour 2. Inflammatory Bowel Disease 3. Gastric Outlet Obstruction 4. Sub acute Intestinal obstruction 5. Neck Swelling 6. Epistaxis | <ol style="list-style-type: none"> 7. Stridor in Children 8. Bladder Outflow Obstruction 9. Metabolic Bone Disease 10. Spinal Injury. 11. Proptosis |
|---|--|

Topic	Learning Object.	Core Content	Discipline Involved
Malignant Bone Tumour	At the end of the session the students will able to- - define bone tumour - classify bone malignancy - mention the Clinical features of bone malignancy - state the Investigations protocol of bone malignancy - outline different treatment options of bone malignancy	- Definition of bone tumour - Classification of bone malignancy - Clinical features of bone malignancy - Investigations protocol of bone malignancy - Treatment modalities of bone malignancy	- Orthopaedics - Histopathology - Radiology & Imaging - Oncology - Physical Medicine
Inflammatory Bowel Disease	At the end of the session the students will able to- - define inflammatory bowel diseases - mention the Clinical features of inflammatory bowel diseases - state the Investigations protocol of inflammatory bowel diseases - outline the management protocol of inflammatory bowel diseases	- Definition of inflammatory bowel diseases - Variants Clinical features of inflammatory bowel diseases - Investigations of inflammatory bowel diseases - Management of inflammatory bowel diseases	- General Surgery - Internal Medicine - Radiology & Imaging - Skin & VD
Gastric Outlet Obstruction	At the end of the session the students will able to- - define gastric outlet obstruction - mention the causes of gastric outlet obstruction - state the clinical features of gastric outlet obstruction - list the metabolic changes in gastric outlet obstruction - state the Investigations protocol of gastric outlet obstruction	- Definition of gastric outlet obstruction - Causes of gastric outlet obstruction - Clinical features of gastric outlet obstruction - Metabolic changes in gastric outlet obstruction - Investigations of gastric outlet obstruction	- General Surgery - Radiology & Imaging - Oncology - Biochemistry

	• mention the preoperative preparation of gastric outlet obstruction • outline the different treatment options of gastric outlet obstruction	• Preoperative preparation of gastric outlet obstruction • Treatment of gastric outlet obstruction	
Sub acute Intestinal obstruction	At the end of the session the students will able to- • define sub-acute intestinal obstruction • list the causes of sub-acute intestinal obstruction • mention the clinical features of sub-acute intestinal obstruction • state the investigations protocol of sub-acute intestinal obstruction • outline the treatment of sub-acute intestinal obstruction	• Definition of sub-acute intestinal obstruction • Causes of sub-acute intestinal obstruction • Clinical features of sub-acute intestinal obstruction • Investigations of sub-acute intestinal obstruction • Treatment of sub-acute intestinal obstruction	• General Surgery • Radiology & Imaging
Neck Swelling	At the end of the session the students will able to- • define neck swelling • list the midline & lateral neck swelling types • enumerate the causes of neck swelling • mention the common clinical presentations of neck swelling • state the investigations of neck swelling • outline the management protocol of neck swelling	• Definition of neck swelling • Midline & lateral neck swelling types, • Causes of neck swelling • Clinical presentations of neck swelling • Investigations of neck swelling • Management protocol of neck swelling	• E N T • General Surgery • Vascular Surgery.
Epistaxis	At the end of the session the students will able to- • define epistaxis • describe the anatomy of nasal septum • state the sites of epistaxis • list the causes of epistaxis • outline the step wise management protocol of epistaxis	• Definition of Epistaxis • Anatomy of nasal septum • Sites of epistaxis • Causes of epistaxis • Step-wise management of epistaxis	• E N T • Anatomy • Medicine
Stridor in Children	At the end of the session the students will able to- • define stridor • list the causes of stridor in children • enumerate the causes of pyrexial & apyrexial stridor in children • state the investigations of stridor in children • outline the management protocol of stridor in children	• Definition of stridor • Causes of pyrexial & apyrexial stridor in children • Investigations of stridor in children • Treatment of stridor in children	• Paediatrics • Paediatric Surgery • E N T
Bladder Outflow Obstruction	At the end of the session the students will able to- • define bladder outflow obstruction	• Definition of bladder outflow obstruction	• Urology • Radiology & Imaging

	• mention the causes of bladder outflow obstruction • explain the patho-physiology of bladder outflow obstruction • list the clinical feature of bladder outflow obstruction • state the investigations of bladder outflow obstruction • outline the treatment of bladder outflow obstruction	• Causes of bladder outflow obstruction • Patho-physiology of bladder outflow obstruction • Clinical Features of bladder outflow obstruction • Investigations of bladder outflow obstruction • Treatment of bladder outflow obstruction	• Gen. Surgery
Metabolic Bone Disease	At the end of the session the students will able to- • define metabolic bone disease • enumerate the types of metabolic bone disease • list the causes of metabolic bone disease • state the clinical feature of metabolic bone disease • state the complications of metabolic bone disease • list the investigations of metabolic bone disease • outline the management protocol of metabolic bone disease • mention the prevention of metabolic bone disease	• Definition of metabolic bone disease • Types of metabolic bone disease • Causes of metabolic bone disease • Clinical Features of metabolic bone disease • Complications of metabolic bone disease • Investigations of metabolic bone disease • Management of metabolic bone disease • Prevention of metabolic bone disease	• Orthopaedics • Physiology • Radiology • Physical Medicine
Spinal Injury.	At the end of the session the students will able to- • define spinal injury • state the types of spinal injury • list the causes of spinal injury • mention the clinical features of spinal injury • state the complications of spinal injury • list the investigations of spinal injury • outline the management protocol of spinal injury • outline the rehabilitation process of spinal injury	• Definition of spinal injury • Types of spinal injury • Causes of spinal injury • Clinical Features of spinal injury • Complication of spinal injury • Investigations of spinal injury • Treatment of spinal injury • Rehabilitation process of spinal injury	• Orthopaedics • Surgery • Radiology & Imaging • Anatomy • Neurology • Urology • Neurosurgery
Proptosis	At the end of the session the students will able to- • define proptosis • state the types of proptosis • list the causes of proptosis • mention the clinical feature of proptosis • state the effects of proptosis • list the investigations of proptosis • outline the management protocol of proptosis	• Definition of proptosis • Types of proptosis • Causes of proptosis • Clinical features of proptosis • Effects of proptosis • Investigations of proptosis • Treatment of proptosis	• Ophthalmology • E N T • Endocrinology • Internal Medicine.
